Sprint/Milestone:	3.1.0		

Description

I'm desperate to get gtk3x-client to at least compile with later gtk versions, and to start iterating better versions from that. One way to do that is to heavily comment out parts of the code that would be hard to port to newer gtk versions. We've already done so for drag&drop stuff when there simply was no suitable implementation to use in some gtk development versions. This ticket is about commenting out chatline.c GtkToolButton usage.
